

**Renfro's Alaskan Adventures Inc.**  
**Special Recreation Permit (SRP) General Terms and Stipulations**

This SRP authorizes Renfro's Alaskan Adventures to conduct guided hunts for brown bear, black bear, and caribou on the BLM-administered lands within GMU 18. A temporary base camp will be located two miles east of Karl Creek in the Kilbuck Mountains. All hunting will take place on foot. The base camp will consist of one to four wall tents depending on the number of clients, for cooking, eating, sleeping and socializing. Access to the site will be by wheeled aircraft landing on tundra runway nearby. Authorized dates will coincide with the State of Alaska hunting regulations for the named species in GMU-18

**Issuance of this permit requires the permittee to accept and comply with the General Terms and Stipulations that are a part of the issued Special Recreation Permit.**

Terms and Stipulations

In addition to the terms included on the back of the special recreation use application and permit (Form 8370-1), the following general terms and stipulations are applicable and a part of this permit.

I. General Terms

- A. The permittee shall comply with all Federal, State, and local laws, ordinances, regulations, orders, postings, or written requirements applicable to the area or operations covered by the Special Recreation Permit. The permittee shall ensure that all persons operating under the authorization have obtained all required Federal, State, and local licenses or registrations. The permittee shall make every reasonable effort to ensure compliance with these requirements by all agents of the permittee and by all clients, customers, participants, or spectators under the permittee's supervision.
- B. A Special Recreation Permit authorizes special uses of the public lands and related waters and, should circumstances warrant, the permit may be modified by the BLM at any time, including modification of the amount of use. The authorized officer may suspend or terminate a SRP if necessary to protect public resources, health, safety, the environment, or because of noncompliance with permit stipulations. Actions by the BLM to suspend or terminate a SRP are appealable.
- C. No value shall be assigned to or claimed for the permit, or for the occupancy or use of Federal lands or related waters granted thereupon. The permit privileges are not to be considered property on which the permittee shall be entitled to earn or receive any return, income, price or compensation. The use of a permit as

collateral is not recognized by the BLM.

- D. Unless expressly stated, the SRP does not create an exclusive right of use of an area by the permittee. The permittee shall not interfere with other valid uses of the Federal land by other users. The United States reserves the right to use any part of the area for any purpose.
- E. The permittee or permittee's representative may not assign, contract, or sublease any portion of the permit authorization or interest therein, directly or indirectly, voluntarily or involuntarily. However, contracting of equipment or services may be approved by the authorized officer in advance, if necessary to supplement a permittee's operations. Such contracting should not constitute more than half the required equipment or services for any one trip and the permittee must retain operational control of the permitted activity. If equipment or services are contracted, the permittee shall continue to be responsible for compliance with all stipulations and conditions of the permit.
- F. All advertising and representations made to the public and the authorized officer must be accurate. Although the addresses and telephone numbers of the BLM may be included in advertising materials, official agency symbols may not be used. The permittee shall not use advertising that attempts to portray or represent the activities as being conducted by the BLM. The permittee may not portray or represent the permit fee as a special Federal user's tax. The permittee must furnish the authorized officer with any current brochure and price list if requested by the authorized officer.
- G. The permittee must assume responsibility for inspecting the permitted area for any existing or new hazardous conditions, e.g., trail and route conditions, land slides, avalanches, rocks, changing water or weather conditions, falling limbs or trees, submerged objects, hazardous wildlife, or other hazards that present risks for which the permittee assumes responsibility.
- H. In the event of default on any mortgage or other indebtedness, such as bankruptcy, creditors shall not succeed to the operating rights or privileges of the permittee's SRP.
- I. The permittee cannot, unless specifically authorized, erect, construct, or place any building, structure, or other fixture on public lands. Upon leaving, the lands must be restored as nearly as possible to pre-existing conditions.
- J. The permittee must present or display a copy of the Special Recreation Permit to an authorized officer's representative, or law enforcement personnel upon request. If required, the permittee must display a copy of the permit or other identification

tag on equipment used during the period of authorized use.

- K. The authorized officer, or other duly authorized representative of the BLM, may examine any of the records or other documents related to the permit, the permittee or the permittee's operator, employee, or agent for up to 3 years after expiration of the permit.
- L. The permittee must submit a Post Use Report to the authorized officer for every year the permit is in effect. All income generating activities associated with your use of public land must be reported in the Post Use Report. Please return this form to the BLM office which issued this permit within 30 days after your operation has ended for the year. If the post use report is not received by the established deadline, the permit will be suspended and/or fines assessed.
- M. The permittee shall notify the authorized officer of any accident which occurs while involved in activities authorized by this permit which result in: death, personal injury requiring hospitalization or emergency evacuation, or in property damage greater than \$2,500 (lesser amounts if established by State law). Reports should be submitted within 48 hours in the case of death or injury, or 10 days in accidents involving property damage. (Note: The authorized officer shall report accidents to the Bureau safety officer.)
- N. Adequate insurance must be obtained by the permittee and kept current in order to protect the user, the permittee, and the U.S. Government against liability and litigation. The minimum general liability limits are:
  - 1) A minimum of \$300,000 per occurrence (persons, bodily injury, or death) and
  - 2) A minimum annual aggregate limit of \$600,000 for bodily injury, property damage, or death arising out of the permittee's operations under the permit, including, but not limited to, the occupancy or use of the lands, structures, facilities, or equipment authorized by the permit.
  - 3) Damage to property in the amount of \$30,000
  - 4) The policy shall list the U.S. Government as an additionally insured. The insurance must be for the company name authorized under the permit.
  - 5) The policy shall also contain a specific provision or rider to the effect that the policy will not be canceled or its provisions changed or deleted before thirty (30) days written notice by the insurance company to the BLM.

- 6) Any aircraft utilized by the operator must also carry liability and property damage insurance.

## II. Stipulations

- A. This multi-year (5 year) permit must be validated annually through the 2008 use season. This can only occur when the permittee has paid annual fees, provided any necessary policies and licenses, and received an acceptable or probationary annual performance rating.
- B. No cutting of live vegetation is allowed and must be left in its natural state.
- C. If a pit privy is to be dug it must be located a minimum of 100 feet from a water source.
- D. Wastewater must be managed in accordance with the statutes administered by the State of Alaska. Wastewater is defined as Human waste (sewage), and Gray Water (water which has been used for personal hygiene, washing clothing or equipment, or sanitizing cooking and eating materials).
- E. Non-Hazardous Solid Waste (trash/refuse) may be burned in campfire pits. All unburned/unburnable trash/refuse will be back hauled from the area and disposed in an approved waste disposal site. All fire rings/pits must be removed or destroyed after use. Trash/refuse will not be disposed of in a Pit Privy.
- F. Hazardous Waste will be back hauled from the area and properly disposed by the generator. Hazardous wastes include, but are not limited to; fuel, oils, and grease; compressed gas cylinders (propane, butane, aerosol cans, etc.); batteries; insect repellants; ammunition; and residues of spills of any of the above.
- G. Fuel and oils will be stored a minimum of 150 feet from any water body. Spills of fuel, oil, or other hazardous substances will be cleaned-up immediately. Adequate spill response/cleanup materials such as absorbent pads, shovels, and heavy gauge plastic bags or containers will be available and on-hand at each location where fuel/oil are stored or used. No dumping of fuel in pits on public land is authorized. Spills of fuel/oil or any hazardous substance will be reported to the BLM as well as the State of Alaska Department of Environmental Conservation.
- H. No commercial use of public cabins is permitted. No burning of trash within 100 feet of any public cabin or historic structure is permitted.

- I. Any OHV use will be limited to the immediate vicinity of camp and used strictly for camp support functions.
- J. To avoid conflicts with bears, sealed bear proof containers will be required for food and unburned waste until such waste can be removed from all camps and spike camp sites. Meat and animal parts will be removed from the field camps as soon as possible to avoid attracting bears. Names, license copies and contact addresses, phone numbers for all guides and assistant guide operating under this permit shall be provided to the BLM authorized officer prior to the hunting seasons they will be operating.
- K. Latitude and Longitude coordinates must be taken from all spike camps and aircraft landings and given to the BLM authorized officer for compliance checks to be administered.
